National Fire Protection Association (NFPA) Facts regarding smoke detectors

-Almost three of every five home fire deaths resulted from fires in homes with no smoke alarms (40%) or no smoke alarms that were working (17%).

-Smoke alarms provide an early warning of a fire, giving people additional escape time. In 2012-2016, smoke alarms were present in three-quarters (74%) and sounded in more than half (53%) of the home fires reported to U.S. fire departments.

- Dead batteries caused one-quarter (25%) of the smoke alarm failures.

The City of Abbeville Fire Rescue strives to keep citizens safe from fire hazards. Partnering with the American Red Cross and State of South Carolina Fire Marshal office, Smoke detectors can be installed free of charge. Contact the Abbeville City Fire Department to schedule a free installation.

If you already have smoke detectors present in your home, this is a reminder that batteries are recommended to be replaced every six months. A good rule of thumb is every time the time changes.
